This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

SAFETY INSTRUCTIONS

WARNING: Always follow basic safety precautions when using these devices. These include:

1. This product contains small parts. If swallowed, it will pose a choking hazard. Keep these small parts away from children !
2. Read, understand and follow your power tool manufacturer's instructions for safety. Always wear safety glasses or eye shields before commencing power tool operation. Always keep hands, face, hair, loose clothing, and body at a safe distance from spindles and cutting tools. Always keep a firm grip on tool handles when in operation. Always disconnect from power source before adjusting power tools.
3. Do not operate the hinge tapper after fatigue or alcohol.
4. Please refer to the manual to install and use the jig.
5. Please always wear eye protection during use.
6. Keep hands and body clear of sharp edges and moving parts.

1	Main body	1
2	12mm Woodworking Chisel	1
3	Hairbrush	1
4	Side Cutter	1
5	Open-end Wrench	1
6	User Manual	1

OPERATION

NOTE:

- 1.The tool needs to be used with the trimming machine.
2. After completion of slotting, all corners are rounded, you need to cut at right angles before installation.

Install the lock body guide plate:

1. Mark the position of the lock body guide plate on the wooden door.

2. Put the slotted retainer on the wooden door and fix it (Clamp by tightening the black nuts.)

3. Using the wood router to slot.

4. Use a chisel to chisel away the curved part to make the edge flat.

5. Complete the slot and install the lock body guide plate.

Install the hinge:

1. Mark the position of the hinge on the wooden door.

2. Put the slotted retainer on the wooden door and fix it (Clamp by tightening the black nuts.)

3. Adjust the screws on the four sides to determine the working range of the wood router.

4. Adjust the depth of the blade of the wood router, and set the blade to extend beyond the edge of the door.

5. Slotting with the wooden router.

6. There is a certain chance that the edge of the door will be damaged when grooving (The material of the wood and the work of the cutter head may cause it), so don't hollow out all the wood at the edge.

7. Use a chisel to chisel off the curved and reserved sections, making sure the edges are flat.

8. Finish slotting and install the hinge.

MAINTENANCE

1. After each use, please install it in time and keep it properly to avoid losing parts .
2. Clean the surface after each use .
