

Spring design

Handle with a spring design, make it insert into the column smoothly, and add extra stability for side awnings.

Aluminum Retractable Side Awning Manual

Separate fittings

The connection between the cassette and the wall is installed with separate fittings, which can extend its service life and facilitate maintenance in case of problems.

Robust and resistant to rust

Aluminum frame makes this side awning sleek and resistant to rust, and automatic roll-back function, makes the fabric easily retract into the fully-covered awning cassette for a longer lifespan.
