02

APPLICATION

Bench vice is used to clamp workpieces. It is installed on the work stations to clamp the workpieces. It is an necessary tool in the schlosserei. Rotating disc type clamp body can revolve so that make the workpiece rotate to the suitable place. Most work of fitter are finished on the bench vice. For example, the saw, the file, the chisel and components in stalling and dismantling.

INSTALLATION**Install the pliers on the clamp table****1- Operating instruction**

The height of operator working will be suitable because the bench vice is installed on the work bench. Usually the jaw height is flushed with elbow just right. This is ok.

Put the elbow on the bench vice peak and half clenched fists that the fist just support the mandible. Length and width of work bench will be decided by the work.

2- Cautions

(1) Appropriate degree of tightness when clamp the workpiece. Just tight the hand shank by the hand only. Do not add strength with the help of other tools. No clamp-holding force shall be exceeded.

(2) When work strongly, you need try your best to make strength facing to clamp body.

(3) Do not knocking on the clamp body and smooth surface.

(4) Clean and lubricate the surface of lead screw and nut so that it will not rust.
