This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

NOTES

1. Place the fully installed barrel under the desired water source, such as a downspout. Water intake is through the filtered hole on the top of the barrel. The top of the barrel can also be unzipped for water intake or removal in bulk.
2. The water barrel may not take form and be fully stable until some water is filled into the container. It is recommended to place the barrel in your desired location after installation and prefill some water into the container.
3. All joints have been installed in advance. If there is water leakage, please check and tighten the joints.

USE

1. After getting the product, unroll the rain barrel (Zipper/filter hole side is the top). Keeping the outlet valve closed, fill in the liquid from the top.
2. Install 6 supporting foot strips and start to use.

MAINTAIN AND STORAGE

1. Please use mild detergent and water for cleaning.
2. Don't scrub with hard objects like brushes.
3. Dry before storage. Do not store in a dark, damp place.
4. Clean the debris at the filter port in time to avoid clogging.
5. If the barrel body is damaged, it can be repaired with the attached patch (Please bring your own glue).
6. If the joint is leaking, tighten the joint or wrap waterproof tape (Provide for yourself) on the thread of the joint before installing it (As shown below).

Note: If you install and remove the connector yourself and the switch is not vertical, try increasing the number of winding laps of waterproof tape.
