This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

NOTES

1. Keeping the outlet valve closed, fill in the liquid from the inlet valve on the top.
2. The diameter of the water injection tube should be less than 1.5" so that the air in the tank can be discharged.
3. Ensure all accessories are firmly tightened by hand. Improper tightening of accessories can lead to leakage.

USE AND CLEAN

1. After getting the product, unroll the rain bag.The water inlet is at the top.

2. Install water outlet valve(Clockwise tightening). The outlet valve is larger and needs to be installed more forcefully until the valve is centered.

MAINTAIN AND STORAGE

1. Please use mild detergent and water for cleaning.
2. Don't scrub with hard objects like brushes.
3. Dry before storage. Do not store in a dark, damp place.
4. Clean the debris at the filter port in time to avoid clogging.
5. If the barrel body is damaged, it can be repaired with the attached patch (Please bring your own glue).
6. If the joint is leaking, tighten the joint or wrap waterproof tape (Provide for yourself) on the thread of the joint before installing it (As shown below).

Note: If you install and remove the connector yourself and the switch is not vertical, try increasing the number of winding laps of waterproof tape.
