This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there is any technology or software updates on our product.

**bolt cutters manual instruction**

**WARNING!**

1. Before using this product, please read instructions carefully and understand the specifications.
2. Disconnect power supply before working if cut wiring.
3. Inspect before every use; do not use if damaged. If they are loose, tighten them in time to avoid damage to the cutting edge.
4. Keep away from children.
5. When using this product, be sure to wear personal protective equipment such as protective gloves and goggles to prevent accidental injury.
6. When using this product, pay attention to keep the jaws clean and lubricated to prolong the service life.
7. Do not use this product for Object being cut beyond its range.
8. When using this product, do not put your fingers or other objects into the jaws to avoid injury.
9. Please don't use bolt cutter head instead of a hammer to strike.

**1. The advantage of the strong Mini bolt cutters**

- 1.1 The blade drop- forged with super alloy steel.
- 1.2 The blade integral heat treatment, and the cutting edge is treated separately by high frequency, with excellent strength and toughness.
- 1.3 The blade is treated by oxidation process,with good black luster and rust resistance.
- 1.4 The blade adopts riveting sealing process, no need to adjust the cutting edge gap, more suitable for long time operation.
- 1.5 Streamlined humanized handle design, and adding dipped plastic process , grip more comfortable.
- 1.6 The biggest highlight is that it can be operated with one hand, and cut smoothly.
- 1.7 The concave design of the plate ,making the shearing operation more convenient and saving labor.

**2. Proper using instruction**

Wearing necessary protective items (such as gloves, glasses, etc.) when using.

- 2.1 Before cutting, firstly estimating the main parameters ,such as hardness and diameter . Usually:(1) the diameter with high hardness should not exceed 2mm, (2) the diameter with low hardness should not exceed 3mm.
- 2.2 It is preferred to cut in the middle and back of the cutting edge, which is safe and labor-saving.
- 2.3 Carefully cut the front end of the cutting edge, avoiding forced cutting leading to distortion and damaging of the front end of the cutting edge.
- 2.4 Be cautious to cut the high temperature steel bar .
- 2.5 After operation, the blade should be properly cleaned and lubricated, which is more conducive to the subsequent operation.

**3. Abnormal characteristics of usage**

- 3.1 Strictly prohibit to cut with charged body.
- 3.2 Strictly prohibit to cut steel nails, steel strand and other hard items.
- 3.3 Strictly prohibited to wrench and cut.
- 3.4 Strictly prohibited to shear medium and high hardness steel bars at the front end of the cutting edge.
- 3.5 Strictly prohibited hit other objects as a hammer.
- 3.6 Minimize emergency overload shear.
