POTTERY WHEEL MACHINE USER MANUAL

We continue to be committed to offering tools at competitive prices. "Save Half", "Half Price", or any other similar expressions used by us only represent an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and do not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when placing an order with us if you are saving half in comparison with the top major brands.

POTTERY WHEEL MACHINE

MODEL:LSMNSP-515

NEED HELP? CONTACT US!

Have product questions? Need technical support? Please feel free to contact us:

CustomerService@vevor.com

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

SAFETY INSTRUCTIONS

WARNING: Read all safety warnings, instructions, illustrations and specifications provided with this electrical equipment. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

•	Warning - To reduce the risk of injury, user must read instructions manual carefully.
\sim	Alternating current
	This symbol, placed before a safety comment, indicates a kind of precaution, warning, or danger. Ignoring this warning may lead to an accident. To reduce the risk of injury, fire, or electrocution, please always follow the recommendation shown below.
凸	HOUSEHOLD USE ONLY

- 1. This equipment is only applicable to ceramic drawings and cannot be used for other purposes. Do not use the equipment brutally.
- 2. The equipment shall be placed on a cool, ventilated, dry, dust-proof and level ground.
- 3.Users must wire and install according to electricity safety standards.
- 4.Do not change the rotation direction when the motor is running. To change the rotation direction, stop it first, and start it after the motor completely stops rotating.
- 5.Please use a towel or sponge to clean the machine body, and do not use a lot of water to wash it to avoid water immersion in the motor, switch, bearing, and other parts, causing failure.
- 6.Before use, make sure that the switch and pedal are in the stop position before inserting the power.
- 7. When repairing or replacing parts, the switch must be cut off and the power supply must be unplugged.
- 8. Children should use this equipment with adult(Note: This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or

mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision).

MODEL AND PARAMETERS

Model	LSMNSP-515	
Maximum Payload(Clay)	1KG	
Voltage	100-240V∼ 50/60Hz	
Power	30W	
Speed	0-330r/min	
Sound power level	55dB	

STRUCTURE DIAGRAM

- 1.Removable water basin
- 2. Aluminum turntable
- 3. Equipment body

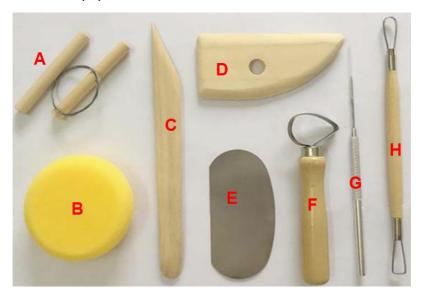

- 4.Speed regulation switch
- 5.Forward/reverse switch
- 6.Power plug

TOOL ACCESSORIES AND USE

1.Apron(x1): Prevent clothes from getting dirty.

2. 8-Piece Tool Set(x1)

A(Clay cutting line): Assist in precisely cutting clay (cutting surface is very smooth)/repairing and leveling the mouth of the work/taking away the finished product.

B(Small yellow sponge): Add water or absorb water/trim the surface or mouth edge to make it smooth.

C(Wooden knife): Trim the bottom for later removal/trimming.

D(Wooden scraper): Trim the opening/shape and remove the excess clay on the surface to make it smooth.

E(Stainless steel scraper): Remove the excess clay on the surface to make it smooth.

F(Circular large flat wire knife): Trim the surface of the vessel/ control the thickness/trim out the bottom ring foot.

G(Steel needle): Scrape off excess clay from the mouth edge/remove air bubbles/punch holes.

H(Ribbon flat wire knife): Finely trim the surface of the utensil or circle the foot.

3.Plastic Printing 8-piece Set(x1): Texture decoration, bonding, clay modeling, and so on(As shown below).

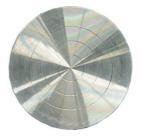

4.Aluminium turntable($\Phi65mm+\Phi100mm$): The size of the turntable depends directly on the maximum diameter we can achieve.

(Loosen the bolt with a wrench and replace it)

OPERATING STEPS

Step1:Take out a proper amount of clay, knead it into a cone shape, fix it at the center of the rotary table, and press it (wet your hands).

Step2: Plug in the power (If the water basin is not installed, install the water basin first).

Step3:Choose the direction of forward (clockwise)/reverse (counterclockwise) rotation according to your needs.

Step4:Turn the knob to adjust the proper speed. (Clockwise acceleration, reverse deceleration)

Step5:Clay molding with tools.

Step6:Dry the body surface quickly with a hot air gun (1-3 minutes).

Step7:Clay-mold repairs with tools.

Step8:Creative painting and coloring can be carried out according to their own needs.

After the work is completed, stop the machine in reverse order.

Remove the molding with a scraper/clay cutting line.

Place in a cool place for a period of time before firing.

		professional to debug it.	

CLEAN AND CARE RULES

- 1. After finishing the equipment operation, it is necessary to clean the clay on the surface of the turntable and wipe the water stains on the surface of the turntable (Do not rinse directly with water).
- 2. Check the parts regularly for looseness.
- 3. If you use it sparingly, run it at least once a month.
